Art Unit 1711

This application contains claims directed to the following patentably distinct species of the claimed invention: Applicants are required to elect a single oxygen scavenging polymer from one of the polymers set out at page 7 lines 8-24 of the instant specification or a material containing a moiety of structure 1 as set out at the top of page 8 of the specification or a material containing a moiety of type II as set out at the top of page 9 of the instant specification. If applicants elect a material having a moiety of the type I or elect a material having a moiety of the type of II, then applicants should also select a single choice for q_1 and q_2 and q_3 and q_4 and r and m should also elect a single linking moiety from those at page 8 lines 3-15; applicants should also elect a single oxygen barrier polymer from one of the oxygen barrier polymers in instant claim 3; applicants should also elect a single oxidation catalyst from one of those recited in instant claim 12; applicants should also elect a single compatibilizer from one of those set out in instant claim 10; applicants should also elect a single oxygen barrier layer from one of those set out in claim 41; applicants should also elect a single species of structural layer from one of those set out in claim 43.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic.

Art Unit 1711

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit 1711

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Due to the complexity of this election requirement, no telephone election was attempted.

Any inquiry concerning this communication should be directed to Jeffrey Mullis at telephone number (703) 308-2820.
